Rubric for Module 11 Challenge:

	Proficiency 80 to > 72 points	Approaching Proficiency 72 to > 66 points	Developing Proficiency 65 to > 60 points	Emerging 59 to > 0 points	Incomplete
Deliverable 1: Filter UFO Sightings on Multiple Criteria	The index.html file has the following: (20 pt) ● The list element for the button is removed. ● ALL FIVE list elements for filtering are created. The app.js file has the following: ● The event listener is modified to detect changes to ALL FIVE filters (10 pt) ● The updateFilters() function saves the element, value, and the id of the filter that was changed (20 pt) ● The filterTable() function loops through all of the filters and keeps any data that matches the filter values (20 pt) ● ✓The webpage filters the table based on user input (10 pt)	The index.html file has the following: (18 pt) ● The list element for the button is removed. ● FOUR of FIVE list elements for filtering are created. The app.js file has the following: ● The event listener is modified to detect changes to FOUR of FIVE filters (8 pt) ● The updateFilters() function saves the element, value, and the id of the filter that was changed, with one minor error. (18 pt) ● The filterTable() function loops through all of the filters and keeps any data that matches the filter values, with two minor errors (18 pt) ● ✓The webpage filters the table based on user input (10 pt)	The index.html file has the following: (16 pt) ● The list element for the button is removed. ● THREE of FIVE list elements for filtering are created. The app.js file has the following: ● The event listener is modified to detect changes to THREE of FIVE filters (7 pt) ● The updateFilters() function saves the element, value, and the id of the filter that was changed, with two minor errors. (16 pt) ● The filterTable() function loops through all of the filters and keeps any data that matches the filter values, with two minor errors (16 pt) ● ✓The webpage filters the table based on user input (10 pt)	The index.html file has the following: (15 pt) ● The list element for the button is removed. ● TWO of FIVE list elements for filtering are created. The app.js file has the following: ● The event listener is modified to detect changes to TWO of FIVE filters (6 pt) ● The updateFilters() function saves the element, value, and the id of the filter that was changed, with three or more minor errors. (14 pt) ● The filterTable() function loops through all of the filters and keeps any data that matches the filter values, with three or more minor errors. (14 pt) ● ✓The webpage filters the table based on user input (10 pt)	No submission was received -OR- Submission was empty or blank -OR- Submission contains evidence of academic dishonesty
	Proficiency 8 to > 7points	Approaching Proficiency 7 to > 6 points	Developing Proficiency 6 to > 4 points	Emerging 4 to > 0 points	
Deliverable 2: Structure, Organization, and Formatting	The written analysis has ALL of the following: ● There is a title, and there are	The written analysis has ALL of the following: ● There is a title, and there are	The written analysis has ALL of the following: ● There is a title, and there are	The written analysis has ALL of the following: ● There is a title, and there are	

	multiple paragraphs (2 pts). ● Each paragraph has a heading (2 pt). ● There are subheadings (2 pt). ● Images are correct and displayed where appropriate (2 pt).	multiple paragraphs (2 pts). ● Each paragraph has a heading (2 pt). ● There are subheadings (2 pt) ● Images are correct and displayed where appropriate, but with one or two minor errors (1-2 pt).	multiple paragraphs (2 pts). ● Each paragraph has a heading (2 pt). ● AND ONE of the following: ● There are subheadings (2 pt). ● Images are correct and displayed where appropriate (2 pt).	multiple paragraphs (2 pts). AND ONE of the following: ● Each paragraph has a heading (2 pt). ● There are subheadings (2 pt). ● Images are correct and displayed where appropriate (2 pt).	
	Proficiency **12 to > 10 points**	**Approaching Proficiency** **10 to > 8 points**	**Developing Proficiency** **8 to > 6 points**	**Emerging** **6 to > 0 points**	
Deliverable 2: Analysis	● The Deliverable Fulfills "Emerging" Required Criteria – (6 pts). AND has the following: ● The summary addresses a drawback of the design. (2 pts) ● The summary has TWO recommendations for further development (4 pts)	● The Deliverable Fulfills "Emerging" Required Criteria – (6 pts). AND has at least ONE of the following: ● The summary addresses a drawback of the design. (2 pts) ● The summary has TWO recommendations for further development (4 pts)	● The Deliverable Fulfills "Emerging" Required Criteria – (6 pts). AND has at least ONE of the following: ● The summary addresses a drawback of the design. (2 pts) ● The summary has ONE of TWO recommendations for further development (2 pts)	REQUIRED: ● The purpose is well defined (2 pts). ● The description of how the search criteria works is well described with images (4 pts).
